Monitoring Avian Productivity and Survivorship in Wascana Centre

Since 2010 Wascana Centre Authority has operated a MAPS banding station in the Habitat Conservation Area (HCA).

Six equally spaced days are spent mist-netting songbirds in the HCA, each summer, between June 10 and August 9th.

Ten nets are set up at dawn and are monitored by volunteers and WCA staff for 6 hours. Captured birds are banded and various measurements and data are taken. Birds are quickly released.

2010	332	54	26
