# Wascana Centre Public Engagement and Master Plan Renewal 2022/2023

#### **Overall Engagement Objectives**

To provide the public at large and stakeholders with opportunities to give meaningful input throughout the process of the 2022/2023 Wascana Centre Master Plan Review and Renewal, based on the updated Provincial Capital Commission policies and procedures (601, 601.2, 601.3).

# Master Plan Review and Renewal Background

The Provincial Capital Commission (PCC) provides enhanced visitor experiences and educational programming in Wascana Centre and at Government House to inspire pride in Saskatchewan's Capital City while focusing on stewardship and operating Wascana Centre.

The Master Plan is the key administrative and framework document for Wascana Centre. The Master Plan encompasses the activities, land use, and long-term objectives of the PCC for Wascana Centre. The Master Plan must address legislated requirements and ensure the sustainability of Wascana Centre.

## Public Participation Plan Overview

#### Context

The DTAH and Praxis team will be working with the PCC on a Master Plan Review and Renewal for Wascana Centre as an update on the current 2016 Master Plan. The Master Plan Review and Renewal will include opportunities for public participation at specific milestones throughout the process. The Public Participation Plan identifies how the public and stakeholders will be engaged, the approach for each engagement at each stage of the process, as well as the specific engagement activities and timing. The Public Participation Plan draft will receive input from the Master Plan Public Advisory Committee (MPPAC) and final approval by the PCC Board of Directors (PCC Board). Once approved, the Public Participation Plan will provide the roadmap for all public and stakeholder engagement throughout the Master Plan Review and Renewal process.

The DTAH and Praxis team will use the International Association of Public Participation (IAP2) spectrum of public participation and other culturally appropriate approaches to establish clarity with PCC on the project's promise to those that are engaged. The public may be at different points on the spectrum throughout the four stages of the Master Plan Review and Renewal (see Figure 1).

#### Purpose

The purpose of the Public Participation Plan is to:

- o Identify when and how the public will be engaged throughout the Master Plan Review and Renewal process
- o Identify the engagement approach for Stages 1, 2, 3 and 4 of the Master Plan Review and Renewal
- Identify where on the IAP2 spectrum of public participation the public is situated in each stage of the Master Plan Review and Renewal
- $\circ$   $\;$  Identify target audiences to be contacted and how they best can be reached
- Collate all public participation activities for the Master Plan Review and Renewal process into one planning document, allowing the MPPAC to help co-create the finalized Public Participation Plan (PPP) and provide a check and balance at each stage of the Master Plan Review and Renewal
- Ensure clarity of engagement intent, activities, and timelines that will be communicated to the public and other stakeholders through the Communication Plan for the Public Participation Plan
- o Identify the review process timelines and the resources available to implement the strategy
- o Determine the method of reporting the results of public participation and reporting how feedback will be utilized
- Ensure all other requirements of PCC policies and procedures (601, 601.2, 601.3) are met in the public participation process

### Principles

Public participation for the Master Plan Review and Renewal is informed by several guiding principles. These principles will ensure public participation occurs in a respectful and constructive manner. The guiding principles are:

- *Transparent and Accountable*: Public participation will be well-defined in terms of the public input to be gathered and the use of that input to guide decision-making; the results of public participation activities will be publicly accessible.
- *Provincial Perspectives*: Public participation will incorporate a broad range of provincial perspectives—community-based, local, and regional—in the development process wherever possible.
- Time Sensitive: the public will be provided with adequate notice to participate in the engagement process and will be consulted early in the process to be considered in decision-making; public notice of decisions of PCC will be shared without delay.
- *Meaningful*: Public participation will be genuine and for the purpose of assisting PCC in decision-making before final determinations are completed.
- Inclusive and Accessible: Public participation will involve as broad a range of communities, stakeholders, and individuals as
  possible, especially those directly impacted by a decision, and will be accessible to individuals and groups, providing multiple
  methods for the public to participate.
- Mutually Respectful and Understandable: Public participation will be cooperative and aim to achieve a solid mutual understanding of the issues, goals, and expectations of all parties involved; it is recognized that public participation may not always end in agreement, however, the goal is to obtain a better understanding of all opinions.
- *Consistent*: The public participation process will seek to be consistent for all proponents; depending on the project, public participation plans may vary depending on the nature, size, and scope of the project.
- Innovative and Continuously Improving: Public participation initiatives will be continuously evaluated with the purpose of improving procedures and processes.

# **Goals and Objectives**

The goals and objectives of public participation are as follows:

Ou	r Goals	Ou	r Objectives
1.	Inform the public and stakeholders about Wascana	0	Share easily digestible information with the public and stakeholders to create understanding and facilitate meaningful discussion.
	Centre, the purpose of a Master Plan, and the Master Plan Review & Renewal process.	0	Provide ample opportunity for the public and stakeholders to receive information through leveraging various modes of communication and ensuring information is accessible. E.g., Information is easy to access and available for an adequate length of time.
2.	Consult the public on key	0	Create opportunities for the public and stakeholders to learn, ask questions, have discussions, and
	topics and issues related to		share feedback on key topics and issues related to the Master Plan Review & Renewal process.
	the Master Plan Renewal process.	0	Consult the public and stakeholders in the identification of key topics and issues related to the Master Plan Review & Renewal.
		0	Consult the public and stakeholders on strategic considerations identified by PCC.
3.	Establish clear expectations for the process and potential outcomes.	0000	Compose clear key messages to support the Master Plan Review & Renewal process and outline what outcomes are possible through engaging with the public and stakeholders. Manage expectations by explaining the IAP2 spectrum of public participation and situating engagement activities along this spectrum. Identify the engagement promises of recording feedback, sharing feedback summaries, and producing
			reports that demonstrate how feedback was considered throughout the process.
4.	Consider accessibility, inclusivity, diversity, and equity throughout engagement and communication with the public and stakeholders.	0	Consider diverse stakeholders and stakeholder groups that would be potentially interested in engaging in the Master Plan Review & Renewal process. Ensure steps are taken to be inclusive of those groups, including reaching them with appropriate communication activities.
5.	Report back what was heard and what was done.	0	Build trust, buy-in, and potential champions by sharing what was heard and how it may be considered in the update of the Master Plan.

## **Stakeholder Groups**

Stakeholders for the PCC Public Engagement and Master Plan Review and Renewal include:

#### The Public at Large

- All residents of the City of Regina and surrounding area.
- Other interested members of the public in Saskatchewan.
- Stakeholder groups, including:
  - Community associations
  - Indigenous groups
  - Non-profit associations
  - Businesses, property owners and lessees in Wascana Centre and near Wascana Centre (within 100 metres of boundaries)
  - Provincial government agencies, municipal organizations and agencies, and post-secondary institutions
  - Wascana Centre user groups

### Engagement Approach

The Master Plan Review and Renewal engagement process will include opportunities for the Saskatchewan public at large and stakeholders to participate in a meaningful way. DTAH and Praxis will work with PCC Administration, MPPAC, and the PCC Board to confirm where the public is situated on the IAP2 spectrum of public participation at each stage of the review and renewal process. This will ensure that engagement does not build unrealistic expectations for the process or its outcome. DTAH and Praxis will gain input and feedback from a broad range of public participants and ensure all public engagement is conducted with an IDEA (inclusion, diversity, equity, accessibility) lens.
